

TRAINING

PERSONAL TRAINING

Our team of professional Personal Trainers uses a wide range of specialties designed to help you achieve your fitness, health and overall wellness goals. From athletic conditioning and classic weight training, through kettlebell and functional training work, our Personal Trainers keep your body guessing, help you avoid plateaus, and maintain interest and excitement. Our Personal Trainers maintain professional certifications and accreditations and participate regularly in advanced programming education.

PILATES

Pilates Training improves posture, balance and core strength. When combined with Personal Training, Pilates drastically improves athletic conditioning by decreasing recovery time between workouts.

SMALL GROUP TRAINING

Lead by Elite Personal Trainers, these class style training sessions are limited to 10 participants. On its own, or combined with Personal Training, Small Group Training is a cost effective, fun way to increase workout effectiveness and frequency.
